Caution:

- Avoid eyes, mouth, nasal passages. Do not use on open wounds, eczema, broken skin and/or acne. May cause irritation to sensitive skin or people susceptible to skin allergies - take extra care when painting young children. Always apply a test patch to a small area on inside elbow and leave for 30 minutes before face painting. If irritation occurs discontinue use and remove immediately.
- Do not apply to anyone with a contagious disease i.e. conjunctivitis, chicken pox or cold sores or anyone with head lice.
- We recommend that Mont Marte® Face n Body Paint is **not** applied to children under 3 years due to the sensitive nature of their skin.
- A parent or guardian should always be present whilst face paint is applied and worn by children.

Application:

- Wash the area to be painted with warm, soapy water and dry, before applying face paint.
- Change face painting water frequently and do not add disinfectant to the face painting water.
- Always ensure your applicators (brushes and sponges) are clean before each use. Always clean the applicators before using another colour to avoid cross contamination.
- Always use gentle pressure to apply designs to the skin.
- Apply a base colour with a damp sponge or applicator and then apply a second coat to build up stronger hues as required.
- Use a brush for more detailed work.

Removal:

- Mont Marte® Face n Body Paints are water based - remove with warm soapy water. Do not scrub or use harsh removers.
- Do not leave face paint on skin overnight.
- Do not use baby wipes to remove water based face paint as these are a common cause of allergic reactions.
- Be aware - some paint colours may stain the skin - red, green, blue and black are known to leave light tinting to the skin.
- Gentle baby shampoo may be used to remove any difficult tints.

Health and Safety:

- Use Mont Marte® Face n Body Paint within 18 months of opening. Dispose of unused portion responsibly.
- Before resealing and storing ensure the paint is completely dry.
- Ensure all products are kept clean and free of dust and other contaminants.
- Keep Face n Body Paint away from direct sunlight and store in a cool area for maximum longevity of the product.
- When applying Face n Body Paint wash your hands regularly.
- In some circumstances people are allergic to the approved ingredients and pigments used. If any type of allergic reaction is apparent during the painting procedure (e.g. paleness, shortness of breath, difficulty in breathing, undue swelling or puffiness around the eyes) immediately discontinue painting and seek emergency medical attention.
- It is recommended that you do not mix different brands of face painting products as it is virtually impossible to identify the source of the allergic reaction.

Stains and Spills:

- Always wear protective clothing when applying Face n Body Paint.
- Avoid contact with fabrics, carpet and upholstery as staining may occur.
- In case of accidental contact, spot treat the area affected with liquid soap or baby shampoo. Loosen the face paint with a small stiff brush and then add a little warm water. Sponge off the wet area. Repeat as necessary. Be careful to not use hot water as this may permanently set the stain.
- Note: please always check care labels of affected clothing, fabric, carpets etc before using any of these cleaning suggestions.
